

SALVALYT TAB

the convenient rehydration drink

SALVALYT TAB – effervescent tablets impress with extremely convenient handling. The excellent palatability of this isotonic electrolyte solution ensures fast rehydration, even in severe cases of diarrhoea.

Highly effective buffers

- regulating acid-base metabolism

Excellent palatability

- ensuring reliable high intake

Active lactic acid bacteria

- stabilizing the intestinal microflora

Lactose

- re-energizes and re-hydrates

Balanced electrolytes

- stabilizing electrolyte balance and preventing dehydration

SALVALYT TAB effervescent tablets compensate for excessive losses of water and electrolytes in case of acute diarrhoea. They should be in stock on any farm at any time.

Feeding recommendation:

	dosage	duration
prophylactic rehydration after arrival on farm	feed 1 tablet SALVALYT TAB dissolved in 1 litre of luke warm water once per day	up to 7 days
