

SALVANA ELMOCIN

High quality mineral feed for calves

SALVANA ELMOCIN promotes an early development of rumen function in calves. Enhanced ruminal fermentation will ease weaning. Calf starters combining highest protein qualities and energy density with high palatability promote feed intake and result in enormous growth rates after weaning. **SALVANA ELMOCIN** is fully formulated with all essential minerals, trace elements and vitamins. With an elevated supply of essential micronutrients, high growth rates and the formation of strong bones and joints goes hand in hand.

Life yeast added to support fast rumen development

Fully balanced with minerals, trace elements and vitamins

Supports feed intake and ensures high growth rates

Special formula for highly palatable calf rearing rations

Feeding recommendation:

mix **SALVANA ELMOCIN** into farm based calf starter - inclusion rate: 4 %.

Specification of farm based calf starter feed

66 %	energy - concentrates: wheat-maize-barley, grinded
30 %	protein - concentrates: soybean-, linseed-, rapeseedmeal
4 %	SALVANA ELMOCIN
100 %	

Targets:	
Crude protein	20,0 %
MJ ME / kg	11,3
Calcium	1,0 %
Phosphorus	0,6 %
Sodium	0,25 %
Magnesium	0,25 %
