

SALVANA EUKATOP

with
SALVANA **PHYTO CARE®**

Boosting the calf's immune response!

Problems of the respiratory tract and coughing diseases are directly linked to suboptimal ventilated stalls, especially during the cold period. SALVANAS research and development cluster has invented a product which helps the calf to cope with these stressful conditions. **SALVANA EUKATOP** is based on eucalyptus oils and other highly effective plant extracts. It will substantially relieve the respiratory tract and vitalize calves.

SALVANA EUKATOP
Relieving respiratory problems

Contains eucalyptus oils and highly effective plant extracts

Effectively stabilizing the immune system
