

SALVANA KÄLBERSTOLZ START 10

Optimizing farm based calf starters

SALVANA KÄLBERSTOLZ START 10 promotes an early development of rumen function in calves. Enhanced feed intake and ruminal fermentation will ease weaning. High growth rates after weaning will only be achieved with calf starters containing highest protein qualities and energy density. Furthermore, **SALVANA KÄLBERSTOLZ START 10** is fully formulated with all essential minerals and vitamins for safe and sound calf rearing.

Live yeast promotes early development of rumen microbiota, faster fermentation of solid feedstuffs and higher feed intake

Fully formulated with all essential minerals, trace elements and vitamins

Pregelatinized starch, potato protein and essential amino acids ensure high growth rates

Selected flavours for palatable calf starters

Feeding recommendation:

Include 10% **SALVANA KÄLBERSTOLZ START 10** in farm based calf starters.

**SALVANA KÄLBERSTOLZ START 10 -
booster for farm based calf starters!**
